

## # Summary

- Briefly summarize the research question, methodology, and main findings

## # Introduction

- Background of the research topic
- \* Importance and relevance of the topic
- \* Previous research gaps
- Research question and objectives
- Hypothesis (if applicable)

## # Related Work

- Overview of existing literature on the topic
- \* Key findings and theories
- \* Strengths and weaknesses of previous studies
- Identification of research gaps

## # Methodology

- Research design
- \* Qualitative, quantitative, or mixed methods
- Data collection methods
- \* Surveys, interviews, experiments, or secondary data analysis
- Data analysis methods
- \* Statistical analysis, thematic analysis, or content analysis

## # Results

- Presentation of findings

- \* Quantitative results (tables, figures, or statistical analysis)
- \* Qualitative results (themes, patterns, or quotes)

## # Discussion

- Interpretation of results
- \* Comparison with previous research
- \* Implications for the research question and objectives
- Limitations of the study
- Suggestions for future research

## # Conclusion

- Summary of the main findings
- Implications for practice or theory
- Contributions to the field

## # References

- Cite all sources used in the research paper
